

Table 3. Cultivars susceptible to begomoviruses but carrying resistance to other pathogens and other characters of interest.

Cultivar	Origin and other characteristics
Sun Coast	North Carolina, large fruit, VF <sub>1</sub> F <sub>2</sub> <sup>1</sup>
Rodade	South Africa, bacterial wilt, VF <sub>1</sub> F <sub>2</sub> <sup>1</sup> , determinate growth
Very Firm	Israel, long shelf life, VF <sub>1</sub> , determinate growth
M-82	Israel, processing, very firm, VF <sub>1</sub>
HC-7880	Cuba, determinate growth, firm fruit, processing, VF <sub>SM</sub>

<sup>1</sup> Resistance to *Verticillium* (V), *Fusarium* race 1 (F<sub>1</sub>) and race 2 (F<sub>2</sub>), *Stemphyllium* (SM).
